# TRACK YOUR SKI

## CUTTING THE LARGE ROLL

HONORÉ BECKER

The first step consists of cutting the large roll (LR) into small rolls (SR). The number of SRs and their width varies depending on the type of skin desired. Once the SR is created, these are assembled end-to-end to facilitate the operations that follow (a step also called placing into trays).

## GLIDING

The small rolls are rolled out and form a long strip to which treatment, made in POMOCA, is applied on the skin. The purpose of the glidage is to improve the gliding of the skin.

## FRONT STITCHING

FLORINDA LAVANDEIRA

Once the skin is finished, you still need to sew the front fixings. Sewing varies according to the type of skins.

## LASER

SRDJAN MARKOVIC

The rolls are unwound on the table of the laser before being cut. The cutting of the skin varies according to the desired dimensions (length, width, shape).

## PACKAGING

CATHERINE RAT

As its name suggest, the packaging process consists of putting the skin in a carton and attaching different utensils (cutter, operating instructions, conservation bag etc.)

## REAR STITCHING

MOHAMMET GHALIAH

Once the skin is finished, you still need to sew the rear fixings. Sewing varies according to the type of skins.

## MARKING

During marking, the materials used, the size and the brand are inked onto the glue side of the skin.

## GLUING

AURÉLIEN DESOUBRY

Here again, the small rolls is rolled out and forms a long strip on the underside of the skin which has two different layers of glue

## SPLITTING

FLORINDA LAVANDEIRA

To facilitate the task of the laser, the large trays are again transformed into small rolls (SR) from 30 m to 50 m. The skins are treated and are now ready to be cut.

## CONDITIONING

NATHALIE SALTON

The skins are ready, all we need to do now is send them to various addresses.

**SAIMAA SEALS**

POMOCA, in coordination with EOCA and the Finnish Association of Nature Conservation is supporting the protection of the Saimaa Ringed Seal in Lake Saimaa, Finland. After being close to extinction in the 50's, the Saimaa seal is still in danger today. Their main threat comes from non-approved fishing nets and traps (killing 50% of the baby seals) in addition to the ever-increasing environmental toxins. Today, the total population is estimated to be only 300 seals.

**100% HYDRO-ELECTRIC ENERGY**

Beginning January 1, 2017, the entire POMOCA factory will be running with 100% Swiss Hydroelectric Energy. All the energy consumed at POMOCA (heating, production, offices, etc.) will be ecological.

**PROTECT OUR WINTERS!**

POMOCA is proud of the partnership with Protect Our Winters Switzerland (POW). Since 2017 in Switzerland, POW mobilizes the outdoor community for climate protection. POW leads a community of athletes, activists and forward-thinking business leaders to affect systemic solutions to climate change.

**FLUORO-FREE SKINS**

In 2015 POMOCA switched its entire production to PFOA-free skins. Wishing to push even further, POMOCA has now developed the first skin treatment completely free of all perfluorocarbons (PFCs). The Climb Pro Mohair for 2017 will be the first skin in the market using this new waterproofing treatment: the EVERDRY 3.0. With this change, POMOCA advances beyond the most demanding national regulations on textile treatments and leads the way towards an eco-friendly skin.

**EQUAL OPPORTUNITY EMPLOYER**

POMOCA cooperates with 3 people with disabilities workshops in Switzerland, France and Spain for assembling processes giving work to an equivalent of 3 full-time jobs.

**BAABUK**

To give his waste a second life, POMOCA has partnered with the innovative start-up Baabuk. An up-and-coming Swiss company who offers felted wool shoes inspired by old traditions. Together they upcycled the cuttings into durable and versatile bottoms for a limited series of fun, stylish and durable slippers.

**SKINALP**

At POMOCA we do everything possible to reduce waste through more optimized production technologies. Additionally, we like to give a 'second life' to our excess trimmed material. We have established a partnership with Skinalp of the Aosta Valley, Italy. Skinalp produces unique and functional apparel accessories from the excess plush material of our skins!

Do you want a Skinalp belt? Order it at [www.skinalp.com](http://www.skinalp.com). Proceeds go to support the Sanonani House in Nepal. ([www.sanonani.house](http://www.sanonani.house)).

# Jérémie Heitz

“POMOCA reflects the ideal partner to quickly reach the mountains that I want to ski.”

# TECHNOLOGIES

## WHAT IS A SKIN?

### 1. A PLUSH WITH ANGLED FIBERS...

The plush offers GRIP and GLIDE to the skin. These characteristics vary depending on the material used (nylon, mixed or mohair) and the way the fibers are woven (thicker or thinner; longer or shorter; more or less angled). Normally, a skin that GLIDES more, GRIPS less.

### 2. ...SUBJECT TO VARIOUS TECHNICAL TREATMENTS...

These treatments provide waterproofing for fibers, which is key to preventing snow clumps from forming. Wet fibers can freeze with a change in temperature. When the fibers freeze they attract snow which sticks to the skin, forming clumps. They also give the color to the skins and help with fixing the fibers to the angle/backing, which is why it is important for durability and GLIDE/GRIP.

### 3. ...WITH A LINING...

The lining prevents water transfer from the plush to the adhesive. A lining that is not waterproof causes dampness on the adhesive and reduces its tack (stickiness). The adhesive could come away from the skin and stick to the ski. A quality lining guarantees the correct functioning of the adhesive and also increases resistance to the skin tearing.

### 4. ...AND AN ADHESIVE...

The adhesive attaches the skin to the ski. In cold and wet conditions, adhesion may be difficult: in general, the adhesives do not perform well in water or cold, as it is harder for them to stick in a wet environment (mist or heat in spring/damp snow) or in the cold.

The technologies of POMOCA are based on a deep understanding of snow, enhanced by research and development. Textile engineers and chemists work hand-in-hand with mountain guides and athletes. Together they modify the materials' contact surfaces and thus push the effectiveness of climbing skins to unimaginable heights.

## HYDROPHOBIC TREATMENT

EVER DRY 3.0 represents our largest step forward with respect to the environment: this is the first skin treatment on the market which does not contain any perfluorocarbon, a chemical found to be harmful to the environment. In 2020, the EVER DRY 3.0 will be used to treat all POMOCA skins, making this the first PFC-Free skins brand!

## GRIP

Good climbing grip is very important. So POMOCA has developed a combination of materials and weaving techniques to combine glide and durability with gripping power. Proper alignment and the fiber attachment systems make POMOCA skins very stable under all conditions and for the entire life of the skin.

Edge Grip is POMOCA's innovative bi-component velvet technology, designed for optimal performance. By utilizing a unique combination of fibers that grip at the sides and glide at the center, it provides a perfect balance between Grip and Glide. This synergy offers unparalleled traction and glide, tailored for demanding terrains and serious mountain expeditions.

## MEMBRANE

POMOCA has succeeded in making its classical SAFER SKIN membrane lighter. Thanks to finer layers in the membrane, **SAFER SKIN LIGHT** is 12% lighter (150g/m<sup>2</sup> less). While remaining 100% waterproof, and with slightly less wear resistance, SAFER SKIN LIGHT makes the pair of skins about 60-75g lighter.

Safer Skin Ultra Light (SSUL) is a membrane combining optimal lightness with the durability of the Safer Skin Light. With the SSUL, POMOCA not only reduces the weight but also the size of the skin while maintaining the same level of performance.

SAFER SKIN VERTICAL is the lightest membrane on the market. The membrane is reduced to its minimal form for the best possible weight optimization. Certainly more fragile, but still 100% waterproof, it offers a light weight that previously was unavailable.

## GLIDE

Thanks to the exclusive **GLIDE** process, ski tourers get extra glide with less effort. This treatment, which is applied at the end of the production process and to the entire length of the fiber, makes the skin glide and resist moisture more effectively. Skins with **GLIDE** offer an effective process for the entire life of the skin, and unique anti-glopping performance.

POMOCA has developed a new **GLIDE** process. With the same application technology, but a new, very high-quality **GLIDE PRO** product, skins with **GLIDE PRO** offer exceptional extra glide, which is essential for high-level competitors.

# RACE

## RACE EXPLORE

### Best Value for Racing

The classic POMOCA Race skin allows you to explore the racer inside of you. Fast and easily handled, it is a perfect base to start racing. The skin is made for the most advanced racer who wants to apply personalized waxing.

glide

grip

weight 1150g/m<sup>2</sup> 98g/skin (59mm x 145cm)

## RACE PRO

### World Champions' Choice

The Race Pro skin is the choice of World Cup athletes. With a glide never achieved before, thanks to the velvet and the GLIDE PRO treatment, it is a must to win races.

glide

grip

weight 1100g/m<sup>2</sup> 94g/skin (59mm x 145cm)

## RACE PRO SLIDE

### Flat Racing

A narrower version of the Race Pro, perfect for competitions on low slopes, especially on flat or gentle runs, that allows you to slide on the edges.

weight 1100g/m<sup>2</sup> 88g/skin (55mm x 145cm)

## RACE PRO VERTICAL

### Vertical Racing

The Race Pro Vertical is the lightest POMOCA skin ever made. The velvet is the same as the Race Pro but the skin is built with the lightest membrane. It is the skin especially developed for Vertical Races.

weight 950g/m<sup>2</sup> 81g/skin (59mm x 145cm)

## RACE PRO GRIP

### Best Grip for Racing

In steep and icy conditions, a good grip can make the difference. The Race Pro Grip is the perfect balance between great glide and a reassuring grip.

weight 1200g/m<sup>2</sup> 103g/skin (59mm x 145cm)

## RACE PRO SPRINT

### Sprint Racing

This skin is dedicated to sprints, with a softer glue to enable the sprinter to be as fast as possible during transitions. This skin is also built with a softer membrane to help the sprinter be faster while putting the skins in his outfit.

weight 1000g/m<sup>2</sup> 86g/skin (59mm x 145cm)

### 01 UNIVERSAL BUCKLE

A one size buckle, which fits all the skies tips on the market.

Art.- Nr. 10-0007180102  
1 pair

### 02 CLICK LOCK

The new Click Lock is the durable and simple solution to attach the skins to any ski tip thanks to the universal buckle.

Art.- Nr. 10-0007181222  
1 pair

### 03 Z-HOOK FOR CLICK LOCK

This hook is attached with a simple click on the ready2climb Click Lock, and is designed for skis with a hole at the tip (e.g., Fischer, K2, La Sportiva).

Art.- Nr. 10-0007181906

### 04 STRETCHER FOR CLICK LOCK

This stretcher is attached with a simple click on the ready2climb Click Lock, and is designed for skis with a notch on the tip (e.g., Dynafit, Hagan).

Art.- Nr. 10-0007181907

### 05 TWIN TIP TAIL HOOK

The rear hook designed for Twin Tip skis. Remove the traditional Back Fix hook and slide the strap into this hook. Your skin will be ready for hooking to a Twin Tip!

Art.- Nr. 10-0007185700

### 06 BACK FIX TAIL STRAP

POMOCA's renowned Back Fix rear attachment, now improved with the Power Hook that makes it indestructible and easy to adjust. It is easily attached to any skin using four rivets.

Art.- Nr. 10-0007185601

## SPLITBOARD

### 07 SPLITBOARD TAIL STRAP

The rear attachment for Splitboard, now available as an accessory. Allows positioning and very easy adjustment. It is easily attached to any skin using four rivets.

Art.- Nr. 10-0007185500

## RACE

### 08 TOP FIX RACE

This product consists of a highly elastic 3.5mm traction cord, an elliptical ring with excentric holes, and a reinforced end, making it easy to remove without the need of gloves. TOP FIX RACE is our lightest binding system (5 g).

Art.- Nr. 10-0007182500

# ACCESSORIES

## RIVETS

Rivets for Back Fix Tail Strap, end hooks and general use.

Art.- Nr. 10-0007185300  
Bags of 100 rivets (m+f)

## RIVETS FOR CLICK LOCK

Rivets for Click Lock with punch.

Art.- Nr. 10-0007181998  
Bags of 8 rivets (m+f)

## ENDHOOK

Adapt to POMOCA's tip stretcher fastening system. Ensures the perfect fit of the adhesive parts at the back of the ski.

Art.- Nr. 10-0007185100  
1 pair with rivets, sold in blister

Art.- Nr. 10-0007185200  
1 pair, sold in pack of 6 pairs

## BUCKLE

The simple steel straps can be used so that one adhesive ski skin can fold over another. A fast, easy and cheap method.

Sizes: 65, 75, 85, 95, 105mm.

Art.- Nr. 10-0007180101  
1 pair, white color, sold in Blister

Art.- Nr. 10-0007180100  
1 pair, steel color, sold in pack of 6

Art.- Nr. 10-0007180200  
5 pairs, steel color, different sizes

## TIP AND TAIL EASYSET

- 1 pair of Click Lock with buckle
- 1 pair of Back Fix with rivets
- 1 bag for skins
- 1 precision cutter
- 1 user manual

Art.- Nr. 10-0007160222  
sold in packs of 6

## TIP EASYSET

- 1 pair of Click Lock with buckle
- 1 bag for skins
- 1 precision cutter
- 1 user manual

Art.- Nr. 10-0007160221  
sold in packs of 6

## RACE EASYSET

- 1 pair of Top Fix Race
- 1 skin bag
- 1 user manual

Art.- Nr. 10-0007160205  
sold in packs of 6 easySet

#### TOP FIX STRETCHER

POMOCA complete system. Adapted to each ski shovel and width. Easy to use with your gloves on.

Narrow (bottom buckle 83mm):  
Sizes: 65mm, 75mm, 85mm  
Art. - Nr. 10-0007182201  
1 pair, sold in blister

Art. - Nr. 10-0007182200  
1 pair, sold in packs of 3 pairs

Wide (bottom buckle 95mm)  
Sizes: 75mm, 85mm, 95mm  
Art. - Nr. 10-0007182301  
1 pair, sold in blister

Art. - Nr. 10-0007182300  
1 pair, sold in packs of 3 pairs

#### ADJUSTABLE STRETCHER 68-104MM

One for all. Quick for widths from 68mm to 104mm. Replacement tip for mountain guides.

Art.- Nr. 10-0007182600  
1 pair, sold in blister

#### ELASTIC CORD FOR TOP FIX RACE

Tear-resistant elastic cord, ideal for making competition stretchers.

Art.- Nr. 10-0007182505  
2,5m of cord, for 5-6 pairs of Top Fix RACE.

#### BACK FIX HOOK

Resistant and easy to adjust, the pair of back fix hooks is compatible with the Back Fix Tail Strap.

Art. - Nr. 10-0007185702  
1 pair

Art. - Nr. 10-0007160313  
Sold in packs of 10

#### POWER HOOK

The Power Hook is POMOCA's new unbreakable, easy to adjust, non-slip rear hook.

Art. - Nr. 10-0007185703  
1 pair, sold in blister

#### SPLITBOARD HOOK

The pair of splitboard hooks allows an easy and efficient attachment to the splitboard tail.

Art. - Nr. 10-0007185701  
1 pair, sold in blister

#### SPARE SKIN

The spare skin is here to carry you at the end of your tour! It weight only 120g and can adapt to all the skis, so just leave it in your back pack!

Art. - Nr. 10-0007190160

#### SKINS BAG

Lightweight and practical, the new POMOCA skins bag is the best way to transport and store hides. The back net allows optimal ventilation, protects from oxidation and dust.

Art. - Nr. 10-0007190103

# ACCESSORIES

## GLUE TUBE 75ML

Ideal for partial or total renewal of glue with all temperature warranty. For one pair of skins.

Art.- Nr. 10-0007170100  
sold in pack of 8

## CAN OF GLUE WITH BRUSH 150ML

Ideal for partial or total brushed renewal of the adhesive layer. For two pairs of skins.

Art.- Nr. 10-0007170200  
sold in pack of 7

## ADHESIVE GLUE TIN 1L

Ideal container for controlled renewal of the adhesive layer in large, measured quantities. For 13 to 15 pairs of skins.

Art.- Nr. 10-0007170300

## GLUING TRAY & ROLL

Efficient: the perfect roller for a professional coating.

Art.- Nr. 10-0007170400

## GLUE ROLL 30M

For complete, fast and easy renewal of the adhesive layer simply by ironing.

78 mm · Art.- Nr. 10-0007170500  
128 mm · Art.- Nr. 10-0007170600  
150 mm · Art. - Nr. 10-0007170650

## GLUE SPRAY 50 ML

Emergency glue spray for climbing skins. Smallest container in the market. Compatible with all classical glue climbing skins.

Art.- Nr. 10-0007170900

## PROTECTIVE SHEET 40M

Ideal for protecting and preserving the adhesive coating of the skin at the end of the season.

135mm - Art. - Nr. 10-0007190300

#### LIQUID WAX

A liquid wax for POMOCA skins. Perfect for increasing the impregnation of used skins. It helps to prevent ice glopping and improves gliding.

Art.- Nr. 10-0007170700

#### BICOLOR WAX

"Two-in-one" wax for adapting to different snow conditions. Packaged in a nylon bag with a mini-scraper for removing ice from the skins.

Art.- Nr. 10-0007170720  
sold in dispenser box of 10

#### TRIMMING CUTTER

The cutter has two blades to cut the skins quickly, accurately and cleanly. The sides of the ski are automatically kept clear.

Art.- Nr. 10-0007190400

# HISTORY

The Dufour family's history has been linked to tourism and winter sports since as early as 1870. Louis Dufour, a hotelier in Avants, Switzerland, was the first to use skis in the French-speaking part of Switzerland. The family also organized skiing and bobsledding competitions for the prestigious hosts of Montreux, Switzerland. In the 1930s Louis' son, Éric, an engineer and avid ski touring fan, developed and marketed a canvas rescue sled. Thanks to its skis and poles, the "Gaillard-Dufour" sled was able to transport injured people. Alongside his father, Éric developed the production of non-slip skins, and later adhesive skins, as well as many other mountain accessories. Around 1941, the Dufour company successfully launched rubber sole production for city and mountain shoes.

LOUIS & OLGA DUFOUR

Assisted by his wife, Antoinette, Éric managed the company until 1988.

In 1996 their son, Guy, took up the torch. His expert knowledge of rubber gives POMOCA skins their unparalleled waterproofing. In 2011, POMOCA joined the SALEWA group, turning a new page in its history and facing new challenges.

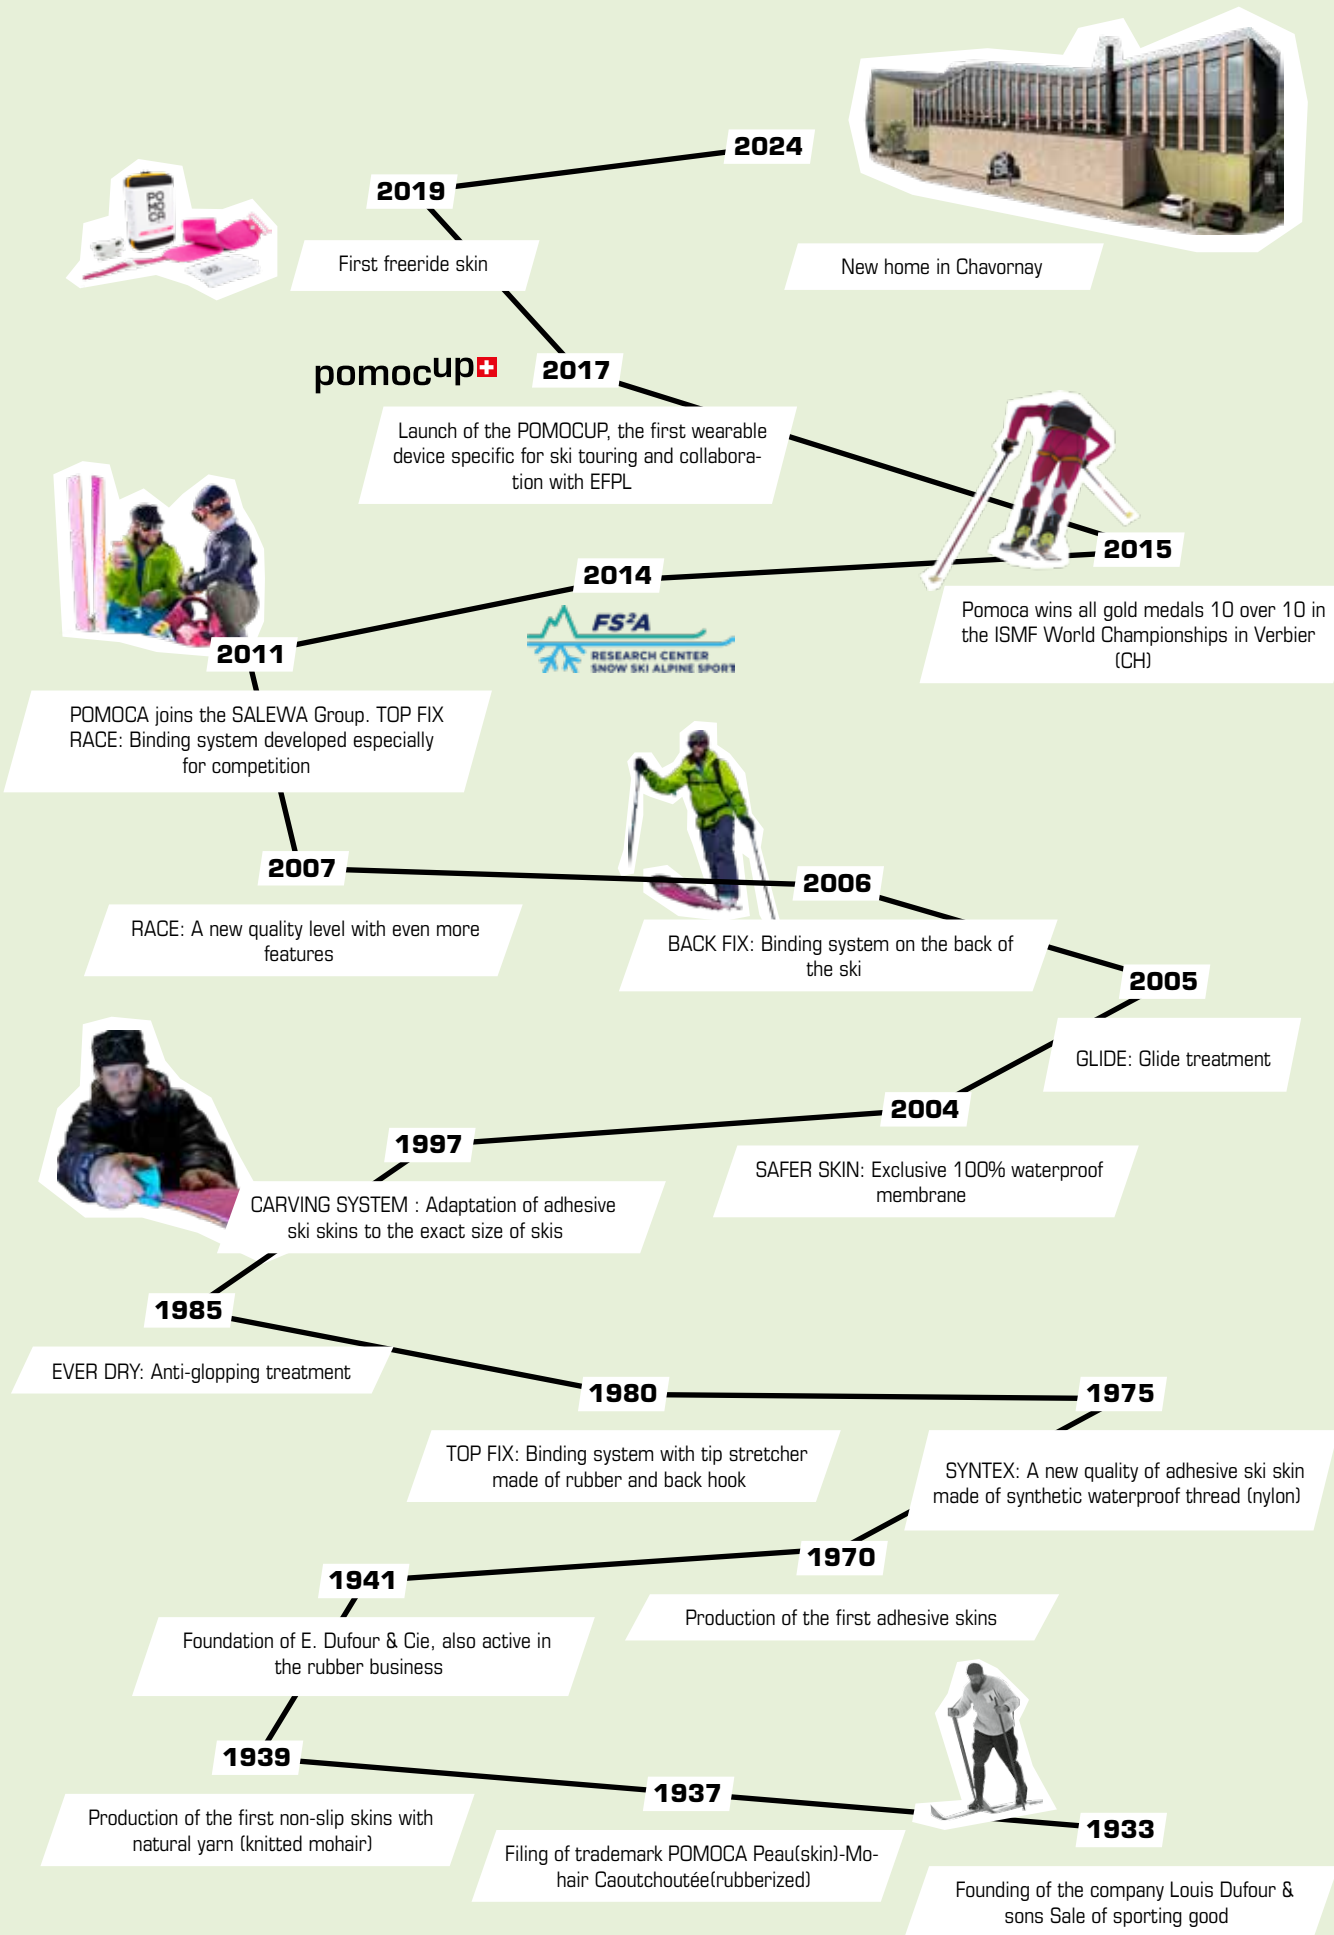

For more than 80 years, thanks to the quality of its products and technological innovations, Swiss label POMOCA has established itself as the undisputed worldwide specialist in climbing skins. Resolutely focused on progress, POMOCA constantly develops new products—something that goes hand in hand with its ambitious and innovative concept—in order to satisfy and delight ski mountaineering enthusiasts.
